-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Claim Rejections - 35 USC § 112

Claims 1,6,7,14-20 and 24-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1,6,14,18,24,28 and 29, the limitation that the tensioning mechanism does not provide a resistant force on a cord in a certain direction is an inaccurate statement. Even in the “free wheeling” position, friction between the pulley and it’s support, friction between the cord and the pulley, inertia of the rotating member, etc., all provide “resistance”. The claims will be addressed with this in mind and the references used also provide inherent resistance in one direction. Consequently, these claims are met as best understood in light of this problem.

In claims 19 and 20, there is no antecedent basis for “means for actuating”.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,14-16,19 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Palmer '375.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

In the embodiment of Figs. 5-7, see spring motor 66, spool 64, and tensioning mechanism 62. When lever 72 is actuated, there is no resistance (subject to the interpretation discussed above) to the cord from tensioning mechanism 62. Regarding claim 15, see means for supporting, hub having 62, means for engaging 62 and means for tensioning 70,72,74.

Regarding claims 19 and 20, the "means for actuating" is indefinite for reasons stated above. Consequently, any structure located in the headrail is considered to be such "means".

Claim 28 is rejected under 35 U.S.C. 102(e) as being anticipated by Palmer '375

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

See the embodiment of Figs. 10-12. In the position shown in Fig. 12, the tensioner 90 does not apply friction to cord 18.

Allowable Subject Matter

Claims 24-27 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 6,7,17-20,29 and 30 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 2-5,8-13 and 21-23 are allowed.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new grounds of rejection. The Examiner regrets his error in not recognizing the rejection under 112(1) above earlier in the prosecution and the effect this error is having on the prosecution of this application.

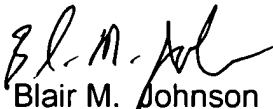

This action is not made final.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blair M. Johnson whose telephone number is (703) 308-0526. The examiner can normally be reached on Mon.-Fri., 6:30-3:00.
